`ggThemeAssist`*RStudio Addins*

Description

Addin to help style your ggplot2 themes

`ggThemeAssist` is a RStudio-Addin that delivers a graphical interface for editing ggplot2 theme elements.

Usage

```
ggThemeAssistGadget(plot)
```

Arguments

`plot` A ggplot2 plot object to manipulate its theme.

Details

To run the addin, either highlight a ggplot2-object in your current script and select `ggThemeAssist` from the Addins-menu within RStudio, or run `ggThemeAssistGadget(plot)` with a ggplot2 object as the parameter. After editing themes and terminating the addin, a character string containing the desired changes is inserted in your current script.

Value

`ggThemeAssist` returns a character vector.

Examples

```
## Not run:  
# example for ggThemeAssist command line usage.  
library(ggplot2)  
gg <- ggplot(mtcars, aes(x = hp, y = mpg, colour = as.factor(cyl))) + geom_point()  
ggThemeAssistGadget(gg)  
  
## End(Not run)
```
