## **Changes in Version 0.8-34**

- Corrected the coding of the rating-scale items of the ISSP 2000. CAR, IND, FARM, WATER, TEMP, and GENE were coded 0 (dangerous) to 4 (not dangerous) instead of 1 (dangerous) to 5 (not dangerous).
- `plotworth()` is defunct – use `plot()` (or `plot.wmat`) instead.
- Minor fixes and improvements.
